Class of 2013 Graduation Rate (2012-13 Cohort)

Using methodology established by the United States Department of Education, the Wyoming Department of Education's Federal Four-Year Adjusted Cohort Graduation Rate, or "on-time" graduation rate, is 77.5% for the class of 2013.

Graduation Rates: Wyoming's Class of 2010 and Beyond

The shift to the new graduation rate was required in order to comply with the federal No Child Left Behind Act. The formula and methodology are similar to the standards set by the National Governors Association in their "Graduation Counts Compact". This federal methodology requires all states to account for students using the same criteria, and use the same graduation rate calculation to ensure comparability across states.

The Wyoming Department of Education applauds every effort to give students options and help them succeed. We also understand that many successful students take more than four years to graduate. Because of this, the WDE calculates five-year and six-year graduation rates to provide a more complete picture of student outcomes. Extended year graduation rates were first published in the 2011-12 school year.

Federal Adequate Yearly Progress Graduation Rate Goal

The Adequate Yearly Progress (AYP) Graduation Rate goal approved by the United States Department of Education, as included in Wyoming's Accountability Workbook, is 85%.

Wyoming 4 year (on-time), 5 year, and 6 year Cohort-Based Graduation Rates for 2012-13

Federal Four-Year Adjusted Cohort Graduation Rate

Student Tracking and Graduation Rate Calculation Process

What is a graduation cohort?

A graduation cohort is a group of students who begin as first-time 9th graders in a particular school year, which is then adjusted over time.

When a student transfers into a school, to which cohort is the student assigned?

A student who transfers into a school is required to be assigned to the cohort in which the student started 9th grade for the first time, even where this event occurred in a different district or school.

How is a cohort "adjusted"?

A cohort is adjusted by adding any students transferring into a cohort in a school and by subtracting any students who transfer out or are otherwise allowed to be removed from the cohort (see details below).

Students entering a Graduation Cohort:

- 1) Promoted from 8th to 9th grade
- 2) Transferring into the Wyoming public school system in any high school grade (9 to 12)

Students Exiting a Graduation Cohort:

- 1) On-Time Graduates (diploma recipients) including summer school students graduating by September 15th following the cohort's fourth year
- 2) Non-On-Time Graduates
- 3) Removed from Cohort

Removed from Cohort:

Students are not counted in a school's graduation rate when exiting before the end of their four years of expected enrollment in high school grades (9 to 12) for any of the following reasons, but only when districts obtain documentation required by federal regulation:

- 1) Transferred to a home school curriculum or another diploma granting high school
- 2) Moved out of the country
- 3) Died

Promoted

Transfers In

Four-Year (On-Time) Graduation Rate Calculation

On-Time Graduates: 17 Students

Non-On-Time Graduates: 3 Students

Expected On-Time Graduates: 20 Students

On-Time Graduation Rate = $\frac{\text{On-Time Graduates}}{\text{Expected On-Time Graduates}}$

$$\text{On-Time Graduation Rate} = \frac{17}{20} = 85\%$$

Expected On-Time Graduates

On-Time Graduates

Non-On-Time Graduates:

Students counted as not graduating in four years may have:

- 1) Dropped out, been rumored to transfer (no written confirmation), or left for reasons unknown by the school
- 2) Left school to participate in a non-high school diploma granting educational or trade program (including a high school equivalency program)
- 3) Attended high school grades (9-12) for 4 full years without graduating (may still be seeking a diploma in 5 or 6 years)

What about Five-Year and Six-Year Graduation Rates?

In the example above, if one of the three Non-On-Time Graduates does graduate in five years, the Five-Year Graduation Rate for this cohort will be $18/20 = 90\%$ (assuming no new additions to or removals from the cohort). Extended year rates are published by the WDE.
