## MEMORANDUM NO. 2016-059

**TO:** School District Superintendents  
Principals  
Curriculum Directors  
Instructional Facilitators and Coaches  
Language Arts Teachers  
Mathematics Teachers, grades 1-7

**FROM:** Brent Young, Chief Policy Officer

**DATE:** April 11, 2016

**SUBJECT:** Free Summer Learning Opportunities for Wyoming Students

## NEW SUMMER LEARNING OPPORTUNITIES FOR WYOMING STUDENTS

The Wyoming Department of Education (WDE) encourages educators and families to help students engage in reading and mathematics practice during the summer months, in an effort to retain the academic skills they learned during the school year. Students grow their reading and mathematics abilities during the academic school year, but their abilities can slip over the summer months. This phenomenon is called “summer learning loss” and is well documented by research. In partnership with MetaMetrics, the WDE is combatting the effects of summer learning loss with two new summer learning initiatives: [Find a Book, Wyoming](#) and [The Summer Math Challenge](#). Both of these activities are free.

### **Find a Book, Wyoming**

*Find a Book, Wyoming* enables students, educators and parents to build custom reading lists based on their reading ability (Such as Lexile® measure) and personal interests. The tool also enables students, parents, and educators to check the availability of books at their local library, and to submit a pledge to read this summer. To access the *Find a Book, Wyoming* tool, visit [lexile.com/fab/wy](http://lexile.com/fab/wy).

### **The Summer Math Challenge**

The *Summer Math Challenge* is a math skills maintenance program based on grade-level state standards. The program is geared toward students who have just completed 1st through 7th grade, and is designed to help them retain math skills learned during the previous school year. Parents who enroll their child receive daily emails with targeted activities and resources. The *Summer Math Challenge* begins June 20th, and runs until July 29th. For more information, visit [quantiles.com/summer-math](http://quantiles.com/summer-math).

Both learning tools use measures that are reported on the Proficiency Assessments for Wyoming Students (PAWS) for grades three through eight as well as grade 11. *Find a Book, Wyoming* uses a student's reading score (reported as a Lexile measure) to provide a corresponding list of texts that fall within that student's reading ability. The *Summer Math Challenge* uses a student's mathematics score (reported as a Quantile® measure) to produce activities tailored to the student's mathematical ability. Both tools have features that allow students, parents and educators to estimate a Lexile or Quantile measure if it is not known.
