In 2011, the average score of fourth-grade students in Wyoming was 244. This was higher than the average score of 240 for public school students in the nation.

The average score for students in Wyoming in 2011 (244) was higher than their average score in 2009 (242) and in 1992 (225).

In 2011, the score gap between students in Wyoming at the 75th percentile and students at the 25th percentile was 34 points. This performance gap was not significantly different from that of 1992 (35 points).

The percentage of students in Wyoming who performed at or above the NAEP Proficient level was 44 percent in 2011. This percentage was not significantly different from that in 2009 (40 percent) and was greater than that in 1992 (19 percent).

The percentage of students in Wyoming who performed at or above the NAEP Basic level was 88 percent in 2011. This percentage was not significantly different from that in 2009 (87 percent) and was greater than that in 1992 (69 percent).

### Average Scores for State/Jurisdiction and Nation (public)

![Graph showing average scores for Wyoming and nation.](image)

* Significantly different \((p < .05)\) from state's results in 2011. Significance tests were performed using unrounded numbers.

### Compare at or above Basic in 2011 to Other States/Jurisdictions

In 2011, the percentage at or above Basic in Wyoming (88) was

- smaller than those in 2 states/jurisdictions
- greater than those in 31 states/jurisdictions
- not significantly different from those in 18 states/jurisdictions

### Compare the Average Score in 2011 to Other States/Jurisdictions

In 2011, the average score in Wyoming (244) was

- lower than those in 7 states/jurisdictions
- higher than those in 30 states/jurisdictions
- not significantly different from those in 14 states/jurisdictions

### Score Gaps for Student Groups

![Graph showing score gaps for student groups.](image)

* Significantly different \((p < .05)\) from 2011. Significance tests were performed using unrounded numbers.

NOTE: Detail may not sum to totals because of rounding.

---

In 2011, the average mathematics scale score for 4th grade students in Wyoming was 244; this was reliably higher than the national average (240).

Wyoming 4th graders also had a higher average mathematics scale score in 2011 than students in Idaho, Nebraska, South Dakota.

Wyoming 4th graders had an average scale score on the 2011 mathematics assessment that was not statistically different from students in Colorado, Montana, or Utah.

Eighty-eight (88) percent of Wyoming’s 4th graders scored at or above Basic on the 2011 mathematics assessment. This was higher than the nation’s 82 percent.

Wyoming had a higher percentage of 4th graders scoring at or above Basic on the 2011 mathematics assessment than Colorado, Idaho, Nebraska or Utah.

The percentage of Wyoming’s 4th graders scoring at or above Basic on mathematics in 2011 was not reliably different from Montana and South Dakota.

Results are based on statistical tests which account for standard errors related to NAEP’s sampling procedures. For additional results and more information about Wyoming NAEP, please visit: [http://edu.wyoming.gov/Programs/statewide_assessment_system/naep.aspx](http://edu.wyoming.gov/Programs/statewide_assessment_system/naep.aspx).
Eighty-eight (88) percent of Wyoming 4th graders scored at or above Basic on the 2011 mathematics assessment. This was higher than the nation's 82 percent.

Wyoming had a higher percentage of 4th graders scoring at or above Basic on the 2011 mathematics assessment than Alaska, Connecticut, and Rhode Island, i.e., states with similar per student expenditures as in Wyoming.

The percentage of Wyoming 4th graders scoring at or above Basic on the 2011 mathematics assessment was not reliably different from Maryland and Vermont.

Wyoming had a lower percentage of students performing at or above Basic than Massachusetts.

Wyoming was among seven states reporting per student expenditures between $13,000 and $14,500 during school year 2007-2008 (most recent data available). The other states were Alaska, Connecticut, Massachusetts, Maryland, Rhode Island, and Vermont.

NOTE: The prekindergarten student membership was imputed for some states, affecting the total student count and per pupil expenditures calculation. Some values were affected by redistribution of reported expenditure values to correct for missing data items, and/or to distribute state direct support expenditures.

On the 2011 mathematics assessment, Wyoming 4th graders had an average scale score that was reliably higher than in Alabama, Alaska, Arizona, Arkansas, California, Delaware, Department of Defense schools, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Nebraska, Nevada, New Mexico, New York, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, and West Virginia.

Wyoming 4th graders had an average scale score that was not statistically different from students in Colorado, Connecticut, Iowa, Indiana, Maine, Montana, North Carolina, North Dakota, Ohio, Pennsylvania, Virginia, Utah, Washington, and Wisconsin.

Wyoming 4th graders had an average scale score which was reliably lower than students in Kansas, Maryland*, Massachusetts, Minnesota, New Hampshire, New Jersey, and Vermont.

*Jurisdiction, unlike Wyoming, did not include eighty-five percent of their fourth grade special education students in the 2011 NAEP mathematics assessment as prescribed by the National Assessment Governing Board.
In 2011, Wyoming fourth graders’ average scale score in mathematics was higher than students nationally; Wyoming also had higher results in seven student groups: both male and female students, Hispanic students, students from low income families (i.e., students qualifying for free or reduced price meals from the National School Lunch Program), and students in city, town, or rural schools (as specified by the US Census Bureau).

Wyoming fourth graders in suburban schools had average scale scores in mathematics that were not reliably different from their peers nationally. This was also true for fourth grade Native American students.

Wyoming average scale scores were lower than the rest of the nation in two of the State’s largest students groups: White students (80% of Wyoming’s 4th graders) and more affluent students (i.e., students not qualifying for free or reduced price meals from the National School Lunch Program—59% of Wyoming’s 4th graders).

Results are based on statistical tests which account for standard errors related to NAEP’s sampling procedures.

For additional results and more information about Wyoming NAEP, please visit: [http://edu.wyoming.gov/Programs/statewide_assessment_system/naep.aspx](http://edu.wyoming.gov/Programs/statewide_assessment_system/naep.aspx).
On the NAEP 2011 mathematics assessment, the proportion of fourth grade male students in Wyoming scoring at or above Basic (88 percent) was not reliably different than female students (87 percent).

The proportion of fourth grade White students in Wyoming scoring at or above Basic (91 percent) was higher than Hispanic (80 percent) and Native American students (62 percent). Sampling was not sufficient to permit reporting of mathematics performance for fourth grade Asian, and Black students.

Wyoming fourth graders qualifying for free or reduced price meals in the National School Lunch Program and scoring at or above Basic (81 percent) was lower than students not eligible for the program (93 percent).
