2009 Science Assessment Content

Guided by a new framework, the NAEP science assessment was updated in 2009 to keep the content current with key developments in science, curriculum standards, assessments, and research. The 2009 framework organizes science content into three broad content areas.

Physical science includes concepts related to properties and changes of matter, forms of energy, energy transfer and conservation, position and motion of objects, and forces affecting motion.

Life science includes concepts related to organization and development, matter and energy transformations, interdependence, heredity and reproduction, and evolution and diversity.

Earth and space sciences includes concepts related to objects in the universe, the history of the Earth, properties of Earth materials, tectonics, energy in Earth systems, climate and weather, and biogeochemical cycles.

The 2009 science assessment was composed of 143 questions at grade 4, 162 at grade 8, and 179 at grade 12. Students responded to only a portion of the questions, which included both multiple-choice questions and questions that required a written response.

Overall Results

- In 2009, the average score of fourth-grade students in Wyoming was 156. This was higher than the average score of 149 for public school students in the nation.
- The percentage of students in Wyoming who performed at or above the NAEP Proficient level was 37 percent in 2009. This percentage was greater than the nation (32 percent).
- The percentage of students in Wyoming who performed at or above the NAEP Basic level was 80 percent in 2009. This percentage was greater than the nation (71 percent).

Compare at or above Basic to Other States/Jurisdictions

- Department of Defense Education Activity (overseas and domestic schools).

In 2009, the percentage at or above Basic in Wyoming was

- lower than those in 6 states/jurisdictions
- higher than those in 26 states/jurisdictions
- not significantly different from those in 14 states/jurisdictions
- 5 states/jurisdictions did not participate

NOTE: Detail may not sum to totals because of rounding.

Score Gaps for Student Groups

- In 2009, male students in Wyoming had an average score that was not significantly different from female students.
- Data are not reported for Black students in Wyoming, because reporting standards were not met.
- In 2009, Hispanic students had an average score that was 19 points lower than White students. This performance gap was narrower than the nation (32 points).
- In 2009, students who were eligible for free/reduced-price school lunch, an indicator of low family income, had an average score that was 16 points lower than students who were not eligible for free/reduced-price school lunch. This performance gap was narrower than the nation (29 points).

NOTE: Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.

The National Assessment of Educational Progress (NAEP) uses both multiple choice and constructed-response test items to assess fourth graders’ skills in three science areas: Physical Science, Life Science, Earth and Space Science. Scale scores range from 0 to 300, wherein a 131 denotes NAEP’s Basic achievement benchmark (i.e., approximately a “grade level” performance); 167 reflects Proficient results which means competency on challenging material, and 224 is considered to be Advanced.

In 2009, the average Wyoming scale score for 4th grade science was 156; this was reliably higher than the national average (149).

Wyoming 4th graders had an average scale score in 2009 that was statistically lower from average science scores in Montana.

Wyoming 4th graders had an average scale score in 2009 that was not statistically different from average science scores in Colorado, Idaho, Nebraska, South Dakota, and Utah.

Nebraska did not participate in the 2009 NAEP science assessment.

Eighty (80) percent of Wyoming’s 4th graders scored at or above Basic on the 2009 science assessment. This was higher than the nation’s 71 percent.

Wyoming had a higher percentage of 4th graders scoring at or above Basic on the 2009 science assessment than Colorado.

The percentage of Wyoming’s 4th graders scoring at or above Basic on science in 2009 was not statistically different from Idaho, South Dakota, or Utah.

Wyoming at or above Basic results in 4th grade science were lower than Montana’s.

Results are based on statistical tests which account for standard errors related to NAEP’s sampling procedures. For additional results and more information about Wyoming NAEP, please visit: http://edu.wyoming.gov/Programs/statewide_assessment_system/naep.aspx.

Grade 4 Report

Funding Snapshot

The National Assessment of Educational Progress (NAEP) uses both multiple choice and constructed-response test items to assess fourth graders’ skills in three science areas: Physical Science, Life Science, Earth and Space Science. Scale scores range from 0 to 300, wherein a 131 denotes NAEP’s Basic achievement benchmark (i.e., approximately a “grade level” performance); 167 reflects Proficient results which means competency on challenging material, and 224 is considered to be Advanced.

Per Capita Student Expenditures During 2007-2008

Wyoming was among seven states reporting per student expenditures between $13,000 and $14,500 during school year 2007-2008 (most recent data available). The other states were Alaska, Connecticut, Massachusetts, Maryland, Rhode Island, and Vermont.

NOTE: The prekindergarten student membership was imputed for some states, affecting the total student count and per pupil expenditures calculation. Some values were affected by redistribution of reported expenditure values to correct for missing data items, and/or to distribute state direct support expenditures.

Achievement Levels

Eighty (80) percent of Wyoming 4th graders scored at or above Basic on the 2009 science assessment. This was higher than the nation’s 71 percent.

Wyoming also had a higher percentage of 4th graders scoring at or above Basic than Maryland and Rhode Island—states with similar per-student expenditures.

The percentage of Wyoming 4th graders scoring at or above Basic was not reliably different from Connecticut and Massachusetts.

Alaska and Vermont did not participate in the 2009 NAEP science assessment.

Results are based on statistical tests which account for standard errors related to NAEP’s sampling procedures. For additional results and more information about Wyoming NAEP, please visit: http://edu.wyoming.gov/Programs/statewide_assessment_system/naep.aspx.
ON THE NAEP 2009 SCIENCE ASSESSMENT, THE PROPORTION OF FOURTH GRADE MALE STUDENTS IN WYOMING SCORING AT OR ABOVE BASIC (82 PERCENT) WAS HIGHER THAN FEMALE STUDENTS (79 PERCENT).

THE PROPORTION OF WHITE FOURTH GRADERS IN WYOMING SCORING AT OR ABOVE BASIC (84 PERCENT) WAS HIGHER THAN HISPANIC STUDENTS (62 PERCENT) AND AMERICAN INDIAN STUDENTS (57 PERCENT). STUDENT SAMPLING IN WYOMING WAS NOT SUFFICIENT TO PERMIT REPORTING OF SCIENCE PERFORMANCE FOR FOURTH GRADE BLACK, AND ASIAN STUDENTS.

WYOMING FOURTH GRADERS QUALIFYING FOR FREE OR REDUCED PRICE MEALS IN THE NATIONAL SCHOOL LUNCH PROGRAM AND SCORING AT OR ABOVE BASIC (68 PERCENT) WAS LOWER THAN STUDENTS NOT ELIGIBLE FOR THE PROGRAM (87 PERCENT).
In 2009, Wyoming’s fourth graders’ average scale score in science was higher than students nationally; Wyoming also had higher results in six student groups: male and female students, Hispanic students, students in city and town schools (as specified by the US Census Bureau) and students from low income families (i.e., students qualifying for free or reduced price meals from the National School Lunch Program). Wyoming average scale scores were lower than the rest of the nation in the State’s largest student group: White students (83% of Wyoming’s 4th graders).
On the 2009 science assessment, Wyoming 4th graders had an average scale score that was reliably higher than students in Alabama, Alaska, Arizona, Arkansas, California, Delaware, Georgia, Florida, Hawaii, Illinois, Indiana, Louisiana, Maryland, Michigan, Mississippi, Nevada, New Mexico, New York, North Carolina, Oklahoma, Oregon, Rhode Island, South Carolina, Tennessee, Texas, Washington, and West Virginia. They also scored reliably higher than the national average.

Wyoming 4th graders had an average scale score that was not statistically different from students in Colorado, Connecticut, Idaho, Iowa, Missouri, New Jersey, Ohio, Pennsylvania, South Dakota, Utah, and Wisconsin.

Wyoming 4th graders had an average scale score that was reliably lower than students in Department of Defense Schools, Kentucky, Maine, Massachusetts, Minnesota, Montana, New Hampshire, North Dakota, and Virginia.

Results are based on statistical tests which account for standard errors related to NAEP’s sampling procedures. For additional results and more information about Wyoming NAEP, please visit: http://edu.wyoming.gov/Programs/statewide_assessment_system/naep.aspx.
