

District Technology Plan Timeline

The E-rate program requires an applicant’s technology plan written prior to submitting a Form 470 - Description of Service Requested and Certification Form. In order to comply with this requirement a draft of the District’s technology plan must be submitted to the Wyoming Department of Education (WDE) the November prior to the technology plan expiration date.

The E-rate program requires an applicant’s technology plan be approved prior to the start of services. An E-rate Funding Year begins July 1st and ends Jun 30th of the following year. The traditional start of services would be July 1st. In order to comply with this requirement the District must have submitted and have received approval of their technology plan by June 30th of the expiration year.

The No Child Left Behind Act (NCLB) Title II Part D – Enhancing Education Through Technology (Title IID) program requires recipients of the funds to have a local long range strategic educational technology plan. (Sec. 2414 (a))

The timelines below have been established to comply with the program requirements of the Title IID and E-rate programs.

<u>District</u>	<u>*Status Report/Amendments Due Date</u>	<u>*Draft Due Date</u>	<u>*New Tech Plan Final Approval Date</u>
Group A			
Big Horn CSD #1	**January 2012	**November 2012	June 2013
Big Horn CSD #2

Wyoming Girls' School			

** The E-rate application window opens each year in early November. Traditionally applicants complete a Form 470 prior to the November opening. If this is the case in your district you must adjust the status report/amendment and the draft due dates. Meaning an update or draft must be submitted to the WDE prior to submitting the Form 470 for your district. Please contact WDE with questions regarding this requirement.
