<b>District Comments:</b>	<b>Oceanography: students construct an applied knowledge of the characteristics of aquatic systems. Students study ocean structure and marine ecology through hands-on exploration of coastal waters, open ocean waters, deep ocean waters, coral reefs, kelp forests, deep ocean vents, and tide pools. Through guided practice of the scientific model and with household instruments, the student conducts a field study of a local aquatic structure for the final project.</b>
<b>District Comments:</b>	Agriscience: This course provides a broad-spectrum overview of the agricultural industry and the industry-based sciences, including basic principles of science as they apply to plants, animals, soil, foods and careers.
