

Teachers: Learn to Teach with GIS

Geographic Information Systems (GIS) is the technology used to collect, study and analyze information about the world around us. Creating an ideal platform to teach a variety of subjects: including math, science, social studies & computer science.

Four regional classes to choose from

To register - click link or go to wygeo.org

Classes will run from 9-5

3.11.2020 | Powell Northwest Community College
[Register](#)

5.12.2020 | Casper Casper College
[Register](#)

4.17.2020 | Diamondville Oyster Ridge BOCES Computer Lab
[Register](#)

4.17.2020 | Laramie University of Wyoming
[Register](#)

Registration is FREE!

Take advantage of this FREE training event to learn the basics of GIS technology and learn about the tools you can use to integrate it into your classroom.

Open to K-12 teachers.

Participation will also earn you ½ PTSB credit.

Grant money can cover your substitute teacher fees and provide up to \$100 travel stipend to help cover your costs.

Attendees at each location will be entered in drawing for gift cards.
